Project Name	Smart Fashion Recommender Application

Intergrating Chatbot to the Application :

IBM Watson Assistant

The screenshot displays the IBM Cloud Watson Assistant management console. At the top, the header includes the IBM Cloud logo, a search bar, and navigation links for Catalog, Manage, and the user profile (Ashfaque Ahamed F's ...). Below the header, the main content area is titled 'Watson Assistant-1t' with a status indicator 'Active' and an 'Add tags' link. A sidebar on the left lists navigation options: Manage (selected), Service credentials, Plan, and Connections. The main panel is divided into two sections. The top section, 'Start by launching the tool', contains a prominent blue 'Launch Watson Assistant' button, along with links for 'Getting started tutorial' and 'API reference'. The bottom section, 'Credentials', provides fields for the 'API key' and 'URL'. The API key field is currently empty, while the URL field contains the endpoint 'https://api.au-syd.assistant.watson.cloud.ibm.com/instances/e...'. A 'Download' button and a 'Show credentials' link are also visible in the credentials section. On the right side of the main panel, a 'Plan' section shows the current plan as 'Lite' with an 'Upgrade' button.
